

# TEXAS SAMPLING, INCORPORATED

## Detector Tube Sample System

### Features and Benefits

#### Safe

- Eliminates Operator exposure during gas detection and sample operation
- System regulates pressure to prevent excess pressure on detector tube while sampling

#### Reduces Exposure

- System is specially designed to seal the Detector Tube to prevent exposure while sampling

#### Easy to Operate

- Easy to read Operation Instructions

#### Representative Sample

- System is designed to assure a representative sample in both detection tube and optional sample cylinder

#### Easy to Maintain Field Proven Design

- Durable, Robust System
- Texas Sampling is an ISO 9001-2000 company and has been designing and manufacturing sample systems since 1991.

### Applications

- Compatible with Detector Tubes including Draeger™ MSA™, Sensidyne™ tubes
- Gas Detection Vials/Tubes for detection of Toxic Gases including: H<sub>2</sub>S, Ammonia, Benzene, CO, SO<sub>2</sub>
- Optional Sample Cylinder Collection for transport to laboratory for analysis
- Available with Restek Sulfinert™ Coating
- Available in various materials including Alloys
